How Complete Beginners Are Quickly Landing High Ticket AI Clients

A Step-By-Step Process For Landing High Ticket AI Clients…

Even if nobody's ever heard of you.

Not just any clients either.

I'm talking about **local and online businesses** who will gladly pay **thousands of dollars** for AI-powered services that can be built in **minutes**, not weeks.

In fact, this is a business model where you can:

- Keep **100% of the profits**, or

- Partner with us, where **we close the deals and help fulfill them with you**

And the best part is, you won't need:

- A list

- Any "street cred"

- Previous client experience

- Inventory

- A team or payroll

This model was designed specifically so **complete beginners can win fast**.

Business Model

So now that I've laid the foundation, let's talk about the business model.

Starting with the 30,000-foot overview…

You're going to be using **AI-powered tools** to help businesses:

- Get more customers

- Capture and handle leads

- Automate follow-up and bookings

And instead of selling ideas, strategies, or services…

You let **AI build the solution first**, then you show it to the business.

No convincing.
No cold pitching.
No "hope they say yes" conversations.

Just real results, shown in advance.

And because these systems naturally support **monthly recurring revenue**, you're not chasing one-off deals — you're building predictable income.

The Service

Now that we've established the foundation and overview, let's get into the nitty-gritty.

The actual service you're delivering to businesses includes:

- Instant websites (especially for businesses that don't have one)

- AI voice agents that answer calls and talk on websites

- AI follow-up and rebooking automations

- Review and reputation systems

- Lead capture and appointment booking

And here's what makes this different from every "agency" model you've seen before…

You're not manually building anything.
You're not duct-taping tools together.
You're not spending weeks fulfilling.

AI does all of the heavy lifting.

How To Do It

By now you might be thinking:

"Okay… but how do I actually get clients if I've never done this before?"

That's exactly what we asked ourselves when we designed this model.

So what you're about to read is the **exact process**, step by step, the same one we used to help a complete beginner land his **first high ticket AI client on day one**.

Step 1: Don't sell what everyone else is selling

Most people fail because they try to sell:

- SEO

- Ads

- Social media management

- Generic "AI automation agency" services

Everyone is pitching the same things.

Instead…

You let AI **create a finished solution first**.

Step 2: Let AI build the solution in advance

AI builds:

- The website

- The voice agent

- The automation

Before you ever talk to the business.

So you're not pitching.

You're showing.

Step 3: Show the business what you built

You simply say:

"I noticed you didn't have this, so I built it for you.

Can I show you?"

That's it.

No sales resistance.
No awkward cold calls.
No convincing.

The Next Part Will Blow You Away

Businesses will pay **thousands of dollars** for something that:

- Costs very little to create

- Takes minutes to build

- Solves an obvious, painful problem

This works because we're in a **massive arbitrage window** right now.

Most businesses:

- Don't understand AI

- Don't have modern websites

- Don't have voice agents

- Don't have follow-up automation

But they **want the results**.

So when you simplify it and show it to them, they gladly pay.

A Huge Opportunity

Here's the huge opportunity most people are missing…

- **Over 80% of business owners have never used AI themselves and even fewer are using it for their business**

- 27% of businesses still don't even have a website

- Missed calls = lost revenue

- No follow-up = lost repeat customers

You don't need:

- 10 clients

- 20 clients

- 30 clients

You only need **a handful of businesses** paying you for systems that run on autopilot.

And because these systems stay in place, you get **paid again and again**.

Why Would A Business Say Yes To You?

This is the question most beginners ask.

And here's the answer:

You're not asking them to "believe" anything.

You're showing them:

- A finished website

- A working AI voice agent

- A system that answers calls and books appointments

And you're backed by a **proven team and platform** with:

- Extensive experience

- Real systems

- Real fulfillment support

Meaning, you're not alone.
And you're not starting from scratch.

The Math (One Simple Example)

Let's say you charge:

- $3,000 per business to deploy the system

- $300 per month to maintain it

Just **10 businesses** puts you at:

- $30,000 upfront

- $3,000 per month in recurring revenue

And many people do far more than that — starting with just one client.

How Can I Start Offering This Right Away?

Just to be clear, this is not another course...

This is a **partnership opportunity**.

When you partner with us, you get:

- Access to the AI tools

- White-label rights

- Step-by-step training

- Scripts and checklists

- Live support and coaching

And if you don't want to close deals yourself?

You can hand them off to us.
We handle the closing.
We handle the fulfillment.
Just split the profits with us.

There's Just One Catch

This is not a public program.

We're only opening this to a limited number of partners while the technology is still early and the opportunity window is wide open.

Once the market catches up, this advantage disappears.

Who Is This Program For?

This program is for people who:

- Want high-ticket income without traditional cold selling

- Are new to agencies or services

- Want speed to profit

- Want recurring revenue

- Want real support instead of being left alone

Ready To Take The Next Step?

If this business model resonates with you, the next step is simple:

[Review this important partnership opportunity while there's still time.](#)

This is how complete beginners are turning AI into high-ticket income, **right now**.

May fortune favor you,

Bill McIntosh
CEO, Buildy.AI

P.S. At the time of this writing, the *Buildy AI Profit Partnership* opportunity will only be available for the next couple of days, so don't delay.
